Authors' Day 2020

Bibliography

The staff of the William B. Glew, MD, Health Sciences Library are pleased to present the eleventh edition of the *Authors' Day Bibliography*. While our traditional Authors' Day celebration was postponed this year, the staff of the library would like to celebrate the many MedStar associates who published and presented in the past year.

This bibliography includes journal articles, posters, abstracts, book chapters, and books that were published in 2019 by authors affiliated with MedStar Health Research Institute, MedStar National Rehabilitation Network, MedStar Washington Hospital Center, and other MedStar entities. The names of the MedStar authors are in bold type in the citations.

The library staff searched the MEDLINE database for citations where at least one of the authors is affiliated with the MedStar health system. In addition, the bibliography includes citations submitted by the authors to library staff before Friday, March 15, 2020. Library staff and others have made every effort to ensure that the bibliography is accurate. Errors or omissions should be brought to the attention of the library staff. The revised version will be posted on the library web site.

Starting in 2014, the information in the Authors' Day bibliographies was added to the MedStar Authors Catalog database. To search this database, go to the **MedStar Authors Catalog** found at: <http://medstarauthors.org>.
